

ZATCA PHASE 2 READY • BUILT FOR SAUDI ARABIA

Run Your Auto Workshop Like Clockwork

Cloud-based workshop management and ZATCA Phase 2 e-invoicing, built specifically for auto repair shops, garages, tire shops and service centers in Saudi Arabia — in Arabic and English.

ZATCA Phase 1 & 2	Cloud / online	Arabic + English	Workshop-built
QR on every invoice	Nothing to install	Bilingual invoices	Job cards, not retail POS

From the car at the gate to the invoice, in five steps

01 Register the vehicle

Plate, chassis/VIN, engine no., Istimara, odometer — with a built-in catalog of the 31 car brands sold in KSA.

02 Open a job card

Record the customer complaint, inspection notes, and work done. Walk-in customers are handled automatically.

03 Add parts & labour

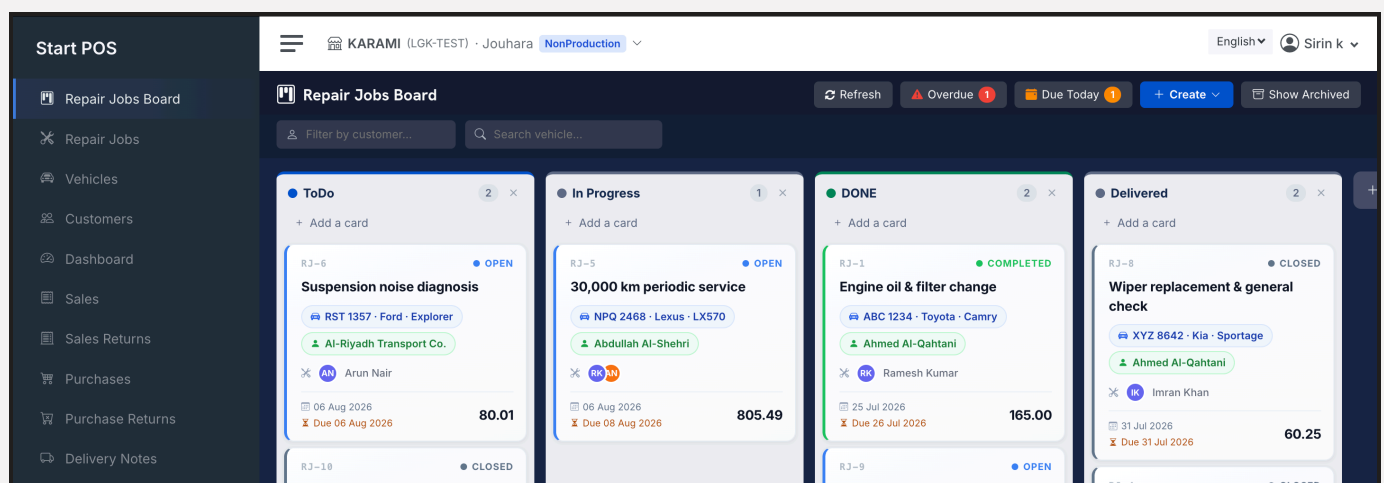

Pick spare parts with live stock per warehouse, set labour charge and discounts — VAT calculates itself.

04 Track on the board

Drag job cards across To Do → In Progress → Done. Custom columns and colors, overdue and due-today filters.

05 Invoice in one click

Convert one or several job cards into a ZATCA sales invoice, quotation, or non-VAT invoice. Vehicle details print on it.

The repair board — every car, every bay, one screen.

Eight tools. One system. Zero paper.

Repair job cards

Complaint, inspection and work-done fields, odometer, delivery date, five job statuses, multiple technicians, auto numbers (RJ-1001).

Drag-and-drop board

Rename and recolor columns, quick-add cards, archive finished jobs, filter by customer or vehicle, overdue counter, linked invoice badges.

Vehicle registry & history

Plate, chassis, engine, Istimara, color, KM and remarks — with the complete repair, sales and quotation history per car.

Spare parts & inventory

Barcode-ready catalog, live stock per warehouse and rack, profit per part, stock transfers, damaged stock, auto price updates.

One-click ZATCA invoicing

VAT invoices, quotations and non-VAT invoices from job cards. Merge several jobs into one invoice. Phase 1 & 2 with QR codes.

Workshop profit dashboard

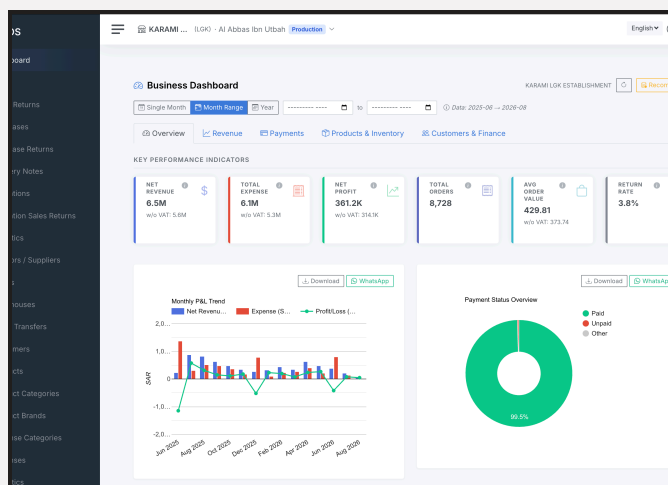

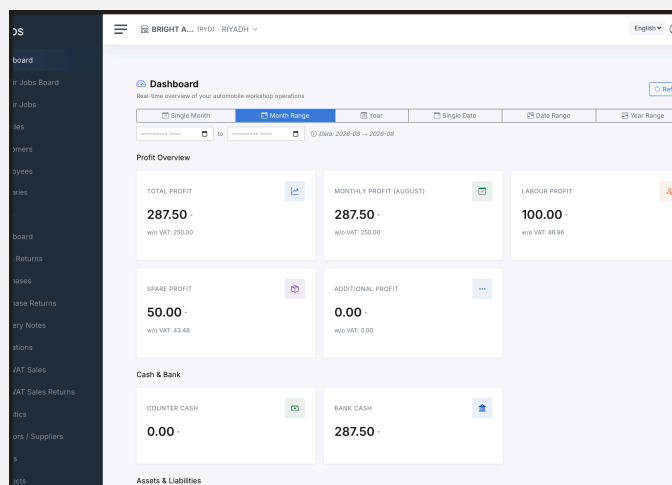

Labour, spare parts and additional-services profit separately, cash and bank, receivables, VAT box, monthly charts, inventory value.

Technicians & payroll

Employee records with salaries, salary-due tracking and payment history. Assign technicians and know who worked on what.

Complete ERP underneath

Purchases, expenses, double-entry accounting, multi-store, roles and permissions, delivery notes, 50+ BI charts, 7 languages.

Ask your workshop anything

A built-in AI assistant with voice chat answers questions about sales, profit and stock in plain Arabic or English — plus churn risk, customer lifetime value and ABC-XYZ inventory classification. Invoices, quotations and reports go to customers straight on WhatsApp.

ZATCA Phase 2, handled. Online, from anywhere.

What ZATCA asks for — already in every invoice

Phase 1 — generation	Phase 2 — integration
QR code on every invoice	Standard & simplified invoices
15% VAT calculated automatically	Bilingual Arabic / English print

Nothing to configure and no consultant to hire — a job card becomes a compliant tax invoice in one click, with the vehicle's brand, plate, Istimara and odometer printed on it.

TAX INVOICE — فاتورة ضريبية

INV-2210 · 02 Aug 2026 · ZATCA Phase 2

Toyota Land Cruiser JED 5512 HNA

Istimara 03/2027 96,420 km

Brake pads + rotors (RJ-1001)	760.00
AC recharge + cabin filter	240.00
Labour — added automatically	250.00

VAT 15% — 187.50

Total SAR 1,437.50

Cloud software — the workshop runs, the system keeps up

Nothing to install

Web-based. Open a browser at the counter and you are working.

Any device

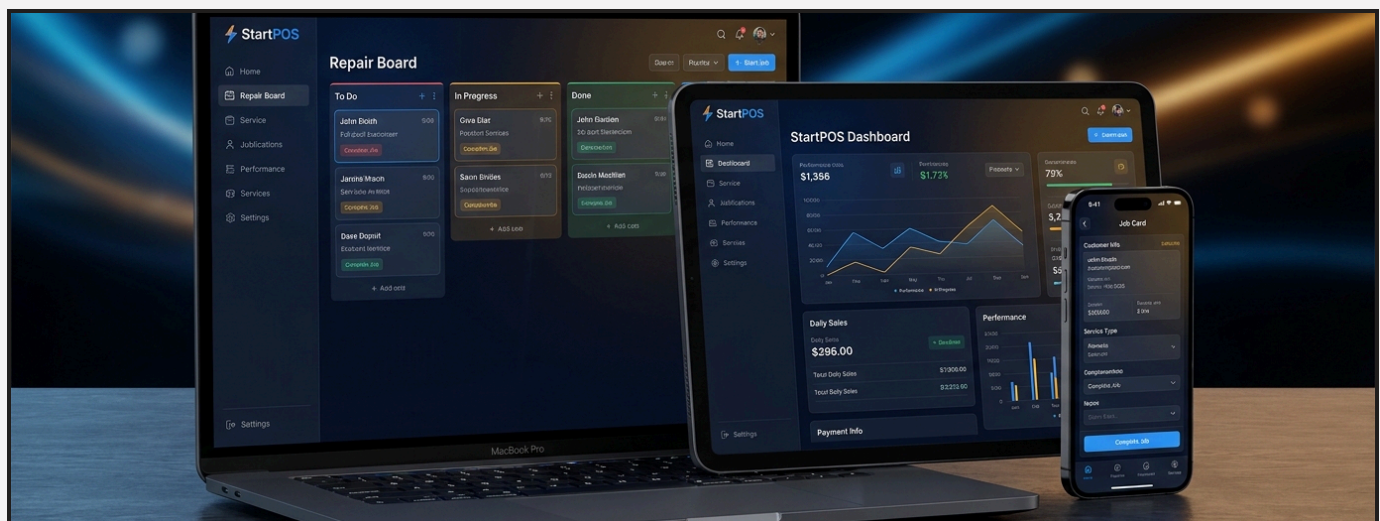

PC at reception, tablet at the lift, phone in the owner's pocket.

Every branch, one login

Multi-store and multi-warehouse with transfers and consolidated reporting.

Live where you are

Real-time updates and WhatsApp delivery of invoices, quotations and reports.

One license. Yours to keep.

Starter POS

SAR 7,500

one-time license, incl. VAT, per store

All prices include VAT, per store. 15-day free trial — no card required, no automatic charges.

Questions workshop owners ask

Is it ZATCA Phase 2 compliant?

Yes — Phase 1 and Phase 2 e-invoices with QR codes, plus VAT, non-VAT and simplified invoices.

Multiple branches?

Built in on Professional and AI Pro: per-warehouse stock, transfers and consolidated reporting.

How does the free trial work?

Message us on WhatsApp and we set up your workshop the same day — full system, 15 days, no card. Keep your data if you continue.

Does it work in Arabic?

Fully — interface, job cards and invoices, in Arabic and English, with five more languages included.

What devices does it run on?

Any browser — PC, Mac, tablet or phone. Existing parts, customers and vehicles import from Excel/CSV.

Is there a monthly subscription?

No. The license is one-time per store and yours to keep — the price you see is the price you pay.

“The board ended the morning shouting match. Every car, every bay, on one screen.”

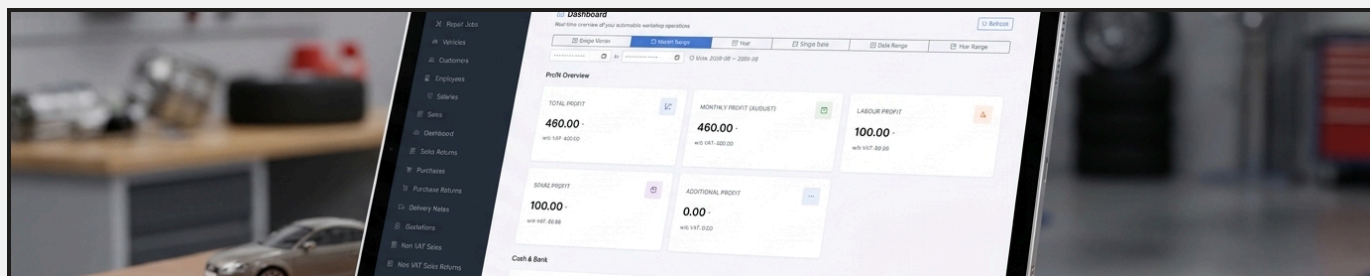

Abu Fahad — Al-Madar Auto Care, Jeddah

“ZATCA used to be my headache. Now the invoice, the QR, the VAT — one click, done.”

Mohammed Al-Qahtani — Express Tire & Lube, Riyadh

“I finally know my parts profit and my labour profit separately. That changed how I price.”

Salem Al-Dossary — Gulf Star Garage, Dammam
